SUSTAINABLE BEECH WOOD STANDS

- Beech is one of the most adaptable hardwoods.
- In response to climate change, the Beech tree population has increased, while maple and birch have declined.
- The natural sustainability and inherent beauty of beech make it the perfect choice for our stands.
- Our two sizes work well with many ASI planters that hold 10" and 14" grow pots (see Planter-Stand Guide on back page).
- Our two finishes—Light Beech and Dark Beech—complement all of our planter finishes, but custom colored stands can also be ordered.
- The stands can be used either side up, depending on the product you select and the look you desire.
- A single handy screw holds the stand tightly together.

FOR INDOOR USE ONLY

Light Beech Stand holding StrongClay Bottom Radius

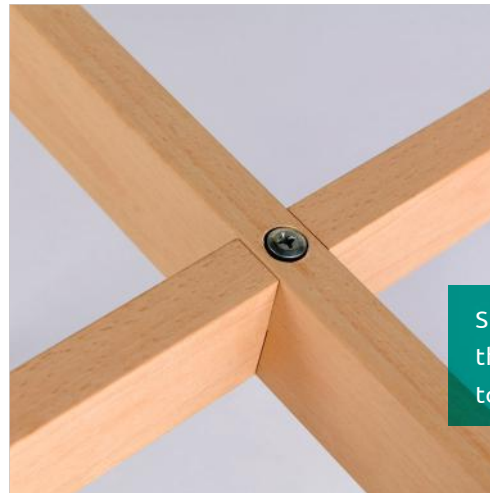

Dark Beech Stand holding Earth Cylinder

Custom color stand "upside down" holding Earth Bowl

Special screw that holds stand together
